Table 1b: Estimated use values of land in orchard use by jurisdiction.

The use values of apple orchard and "other" orchard are estimated for each of the eight Soil Conservation Service land capability classifications. Other orchard refers to peach, cherry, pear, and plum orchards. The values indicated represent the use value of both land and trees.

Estimates apply to tax-year **2015**.

[1] Use value taxation applies only within agricultural and forestal districts.

Transfers (<): The data used for estimating the use value of agricultural land are not published for all towns and for only a few of Virginia's independent cities. When data does not exist for a town or city participating in the use value taxation program, the estimated use values from an adjacent or surrounding county are used. This process is referred to as transferring-in. Transferring-in is also used for jurisdictions with large areas of land lying in more than one physiographic region, for example coastal plain and piedmont. When a transfer-in jurisdiction has been used, it appears after an arrow (<).
